

New! PURELL® Surface Sanitizer and Disinfectant Battery-Powered Sprayer

The new PURELL Sanitizer and Disinfectant Battery-Powered Sprayer can help improve existing and evolving cleaning processes by enabling you and your staff to efficiently disinfect large surface areas and high touchpoint areas throughout the day without harsh chemicals or fumes.

PURELL Battery-Powered Sprayer

Coverage per gallon bottle

1,280 ft²

Product dispensed per set of AA batteries

6 Gallons

Key benefits compared to a manual trigger sprayer:

Do more with less product

- The sprayer enables smaller, more consistent droplet size, which allows you to cover the same size surface area but use less formula.
- By gently twisting the nozzle, you can adjust the spray pattern to widen or narrow without changing the output volume.

Do more with less time

- Reduce the time it takes to disinfect surfaces by up to 81% with the PURELL Sanitizer and Disinfectant Battery-Powered Sprayer.*

	Manual Trigger Sprayer	PURELL Battery-Powered Sprayer
Coverage Volume	5.92 mL of solution per ft ²	2.96 mL of solution per ft ²
Time to cover 3' x 5' surface	64 seconds	12 seconds

*GOJO tested all performance indicators using a standard distance of 6-8 inches from wand tip to surface. Additionally, speed of lateral movement will affect coverage times, etc. GOJO tested using a movement speed that ensured the surface is visibly wet per usage directions for PURELL Surface Spray products.
