PURELL® Cottony Soft Hand Sanitizing Wipes

Individually Wrapped, 40 Individually Wrapped Sanitizing Wipes in Self Dispensing Display Box

Description:

PURELL Cottony Soft Sanitizing Wipes are antimicrobial premoistened hand wipes with 62 percent ethyl alcohol to help reduce the number of germs on hands and remove light soils. They are textured and thicker than PURELL's regular sanitizing hand wipes, and individually wrapped in tear-open packets for portability and to retain moisture. These wipes contain vitamin E and A, aloe, and moisturizers to help keep skin hydrated. The sanitizing wipes come in a branded cardboard display box to help users find them and to encourage use among employees or visitors at locations such as schools or office buildings.
