

METAL TREATMENT RUST CONVERTER

CORROSEAL

FEATURES

- Two in one copolymer rust treatment
- Clings to vertical surfaces
- Neutralizes rust
- Leaves black acrylic protective coating
- Prevents future rusting for up to 1 year
- Dries in 30 minutes
- Non-flammable, water based polymer

PROPERTIES

Appearance: Milky white/beige paste.

Boiling point: 212 °F

Specific gravity: 1.05-1.10 gr/cc

Non volatiles: 25 %

Solubility in water: Soluble

Flash point: None

Storage stability: Keep away from strong oxidizers

pH of liquid: 4-5

Flammability: Non-flammable

Packaging: 4x1 gallon Case
5 gallon pail
55 gallon drum
275 gallon tote

- Properties are typical and subject to usual manufacturing tolerances.

CORROSEAL® is a combination of acrylic copolymers and acids that will neutralize rust and leave a black glossy coating of acrylic paint. It converts rust into an acrylic-iron coating. It also prevents future rusting for up to one year. **CORROSEAL®** is easy to apply and may be brushed or rolled on. It combines two steps in one; a single application neutralizes rust and leaves a protective black acrylic coating. Product will dry within 30 minutes and it can easily be cleaned up by washing down with water.

Refer to the label and attached SDS for instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by Interchem.
