

MEGA SHINE

HYDROPHOBIC SPRAY SEALANT CONCENTRATE

- EXTREMELY GLOSSY
- SAFE FOR CERAMIC AND WAX COATINGS
- HYPER SLICK SURFACE PROTECTANT
- QUICK DRYING AGENT

Interchem's Hydrophobic Spray Sealant is comprised of a unique, micro emulsion of cross-linking polymers and special additives to quickly and effectively hydrophobe paintwork, glass, plastic and rubber moldings and a variety of other surfaces.

Interchem's Hydrophobic Spray Sealant is specially formulated to leave only the active ingredients behind after drying, allowing the formulation to feel hyper slick and be detergent resistant as compared to other last touch or final shine detail sprays. Effortlessly easy to apply, simply spray and wipe. Suitable over any base surface protection whether it is a polymer sealant, wax or any type of ceramic coating.

Use with Interchem's Foam Cannon Pro to effortlessly apply to all exterior surfaces of a vehicle, then dry and buff with Interchem's Premium Microfiber Towels.

DIRECTIONS:

Shake well. After washing the vehicle, add 100ml. of Interchem's Hydrophobic Spray Sealant to 900ml of water in a foam cannon. Avoid spraying on hot surfaces. Spray freely onto the entire exterior of the vehicle. An immediate hydrophobic effect will be observed with milky droplets. Once sufficiently covered, dry vehicle using a quality microfiber towel. Turn towel over and buff to a high gloss. Use with a foam cannon for maximum efficiency.
