

OIL-ONLY ABSORBENT PADS.....

Material Characteristics

Material - Polypropylene
Material Texture Features - Dimpled, High-Linting
Non-Woven Material Technology - Meltblown
Colour - White

Dimensions

Dimensions - 15 in W x 17 in L
Width - 15 in
Length - 17 in
Perforated Width - 7.5 in
Quantity - 100/Bale

Product Features

i Application - Absorbents & Spill Control
Barrier-Backed? - No

i Absorbency Capacity - 20.5 gal (US)

i Absorbency Factor - 18 gl/gs

i Absorbency Weight - Heavy

Class - Oil Only
Perforated? - Yes
Type - Pad

The type of application or end use environment the product is designed for.

The amount of fluid the product can absorb. This is based on the full amount of what is packaged. For example, if a product is sold by the bale, the Absorbency Capacity is based on the full bale.

The amount of fluid an absorbent can absorb compared to the weight.

Qualitative description of the products absorbency factor. The 3 options are Heavy, Medium and Light.

✓ White absorbents pick up petroleum-based fluids, paints and non-water soluble chemicals while repelling water - great for indoor & outdoor use

✓ Heavy weight - specifically designed for continuous leaks and larger spills so you use less material

✓ Perforations provide cost control and reduce waste by allowing you to use only what you need
