

# InterChem

**Removes Cement, Grout & Mortar Residue,  
Limescale Deposits and Efflorescence**

**Interchem's Construction Cleaner** can be used to remove cement, grout and mortar residue, limescale deposits and efflorescence. It is for use on natural stone, granite, slate, ceramic, porcelain, pre-cast concrete and quarry tile. As a phosphoric acid-based cleaner, it does not contain any muriatic acid, hydrochloric acid, salts, or chlorides and it is 100% Biodegradable, Non-Corrosive, Non-Regulated and a Non-Skin Irritant. It is safe to be used on any surface, including glass, aluminium, chrome, rubber, plastic, or paint.

**Interchem's Construction Cleaner** includes detergents for degreasing, corrosion inhibitors, optical brighteners, foaming agents and water softeners. It will also eliminate all rusting issues on your equipment. The phosphoric action removes old rust and oxides and conditions the metal so that no new rust is created during the cleaning process.

*Concentrated Heavy Duty Phosphoric Acid Cleaner*
