

BUILD THE FUTURE

Soudafoam MAXTWO HFO

Applications

- Roof insulation
- Roof/wall connection
- Wall insulation
- Insulating/filling of small gaps in floor and wall

Renovation and new buildings

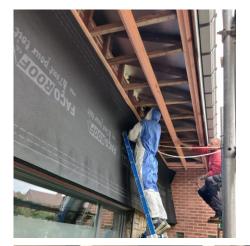

MAXTWO open and closed cell can be used as roof insulation for renovation projects but also in new buildings.

MAXTWO is used to create an airtight seal of closed cell foam between wall and roof connection.

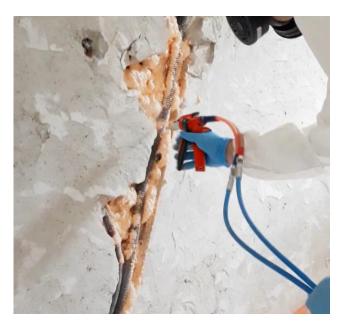

Wall insulation

MAXTWO closed cell foam is used as insulation material in lumber frame construction but also suited for other types of building constructions.

MAXTWO closed cell foam can be used to fill gaps in walls and to insulate/seal wall/floor connections.

- Prefab
- Reefer repair
- Container insulation
- Hot tub insulation
- Boat insulation

MAXTWO open and closed cell foam can be used as insulation material which can be applied at manufacturing site or on building site.

Reefer repair

Reefers which are damaged can be repaired with MAXTWO HD, which is well suited for metal substrates.

Soudafoam MAXTWO HD can be used as insulating material to transform container to office or living space. MAXTWO Refill with heated cabinet is used for this project.

MAXTWO closed cell foam is used as insulation material for hot tubs.

insulation

MAXTWO closed cell foam is used as insulation material during renovation of boats to increase comfort and buoyancy.
