

Concentrate **Mega Shine**

Ceramic Coatings ♦ Glass ♦ Chrome & Trim

UNIQUE FEATURES

- Hyper Slick, Express Quick Detailer
- Safe for Ceramic and Wax Coatings
- Generates a Highly Glossy and Hydrophobic Surface
- Drying Aid

APPLICATIONS

- Ceramic Coating Booster
- Glass
- Chrome & Trim

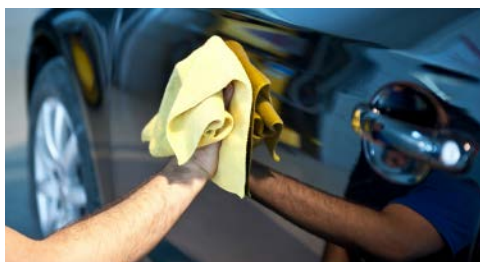

Interchem's Mega Shine is the fastest and easiest way to shine, and protect surfaces. Its unique polymers and special additives allow it to quickly and effectively hydrophobe all external surfaces of a vehicle. The polymers cross-link and cure after application to create an immediately frictionless surface that is extremely slick to the touch and effortlessly hydrophobic.

Generally used with a Foam Cannon for greater coverage after washing, especially for fleet maintenance.

Interchem's Mega Shine is also great when used as a touch-up detailer between washings or as a final touch, showroom shine style detail spray.
