

Ready-To-Use RubberClean

Tires ♦ Mats ♦ Trim

UNIQUE FEATURES

Interchem's RubberClean cleans discoloration and oxidation leaving a brilliant, dark, rich surface. This product can be used in full sun and on any rubber, plastic, or non-porous polycarbonate surface, allowing tire dressings like Tire Shine and VRT Protectant to lay evenly, and last significantly longer.

Interchem's RubberClean contains a unique blend of citrus solvents and surfactants to create a high sudsing formula that removes silicones, greases, wax build-up, polymers, and any previously applied dressings to leave your tires looking like new.
